

SOLUTION BRIEF

Secure Landing Zone Accelerator for Healthcare

The Landing Zone Accelerator (LZA) for Healthcare, a specialized service designed for the unique needs of the healthcare sector. This robust solution ensures alignment with global compliance frameworks and facilitates the secure management of multi-account AWS environments.

- **Industry-Specific Design:** Tailored to meet the stringent requirements of the healthcare industry.
- **Global Standards Compliance:** Conforms with HIPAA, C5, NCSC, ENS High, ISO 27001, and ISO 27002 frameworks.
- **Efficient Governance:** Integrates with AWS Control Tower for streamlined, no-code management of over 35 AWS services.
- **Secure Multi-Account Strategy:** Establishes isolated accounts for enhanced security and resource management

Benefits:

Automation

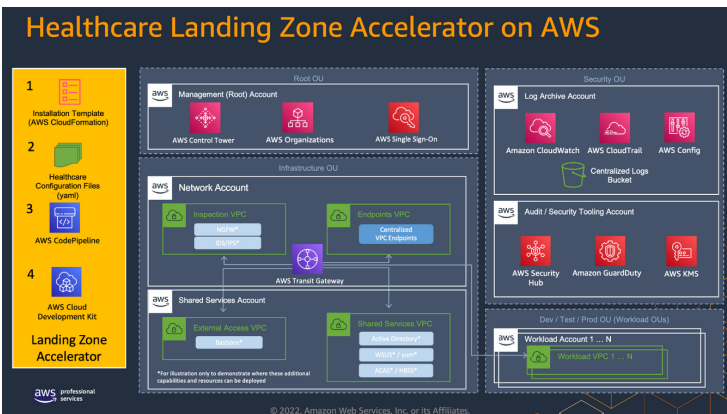

Automatically set up a cloud environment suitable for hosting secure workloads. You can deploy this solution in all AWS Regions. This helps you maintain consistency of your operations and governance across AWS standard Regions, AWS GovCloud (US), and other non-standard partitions in AWS.

Data security

Deploy this solution in an AWS Region suitable for your data classification, and use Amazon Macie to provide sensitive data detection in Amazon Simple Storage Service (Amazon S3). This solution also helps you deploy, operate, and govern a centrally managed encryption strategy using AWS Key Management System (AWS KMS).

Foundation for compliance

Leverage a foundational infrastructure for deploying mission-critical workloads across a centrally governed multi-account environment.

SOLUTION BRIEF

Secure Landing Zone Accelerator for Healthcare

When used in coordination with services such as [AWS Control Tower](#), the Landing Zone Accelerator provides a comprehensive no-code solution across more than 35 AWS services and features to manage and govern a multi-account environment. The LZA is built to support customers with highly-regulated workloads and complex compliance requirements.

The LZA for Healthcare leverages AWS expertise enabling regulated customers to set up their AWS environments in days instead of weeks in an optimized and secure configuration. By reducing the undifferentiated heavy lifting of establishing a regulated cloud environment, organizations have the opportunity to focus on innovative solutions that provide the greatest value to the customers they serve.

Simplify Your Cloud Governance with AWS Control Tower

Leverage AWS Control Tower to efficiently establish and manage your multi-account AWS environment, equipped with prescriptive controls that fast-track your cloud journey. This service simplifies the orchestration of various AWS services, ensuring your organization's security and compliance requirements are seamlessly maintained, whether you're starting fresh or optimizing an existing setup.

- Set up a well-architected, multi-account environment in under 30 minutes
- Automate the creation of AWS accounts with built-in governance.
- Enforce best practices, standards, and regulatory requirements with preconfigured controls.
- Seamlessly integrate third-party software at scale to enhance your AWS environment.
